

## The USAF Band of the Golden West

# Concert Band

### Key Personnel

**Anna Andrew, Technical Sergeant – Operations Coordinator (707) 424-0196 (Office)**

**Dodd Martin, Master Sergeant – Audio Engineer (707) 646-9894 (Cell)**

### STAGING REQUIREMENTS

#### Arrival

**Load-in:** The band will arrive approximately three to four hours before the concert to load-in. A person with keys and access to all required areas must be present for the load-in. A stage manager who can also run the lights is often the best choice. **The stage must be cleaned, cleared, and ready for load-in.**

**Parking:** Parking spaces are required for band vehicles at the performance site. We may have one or two buses, two 15-passenger vans, and one semi-trailer.

#### Stage Area

**Dimensions:** Performance area should be at least 40 feet wide and 40 feet deep.

**Construction:** The stage or area being used must be level with a firm foundation. For outdoor sites: the performance area must be dry. **NOTE:** the band cannot perform in inclement weather (including high winds); we recommend that arrangements are made for an alternate indoor site.

**Stage Manager:** A stage manager who can adjust and monitor lighting during the concert provides for a more impactful and impressive product.

**Lighting:** Stage must be well lit.

**Audio:** Three dedicated 20-amp circuits on stage are necessary (contact the operations coordinator for more information).

**Case Storage:** If possible, a storage area near the stage should be set aside for equipment cases.

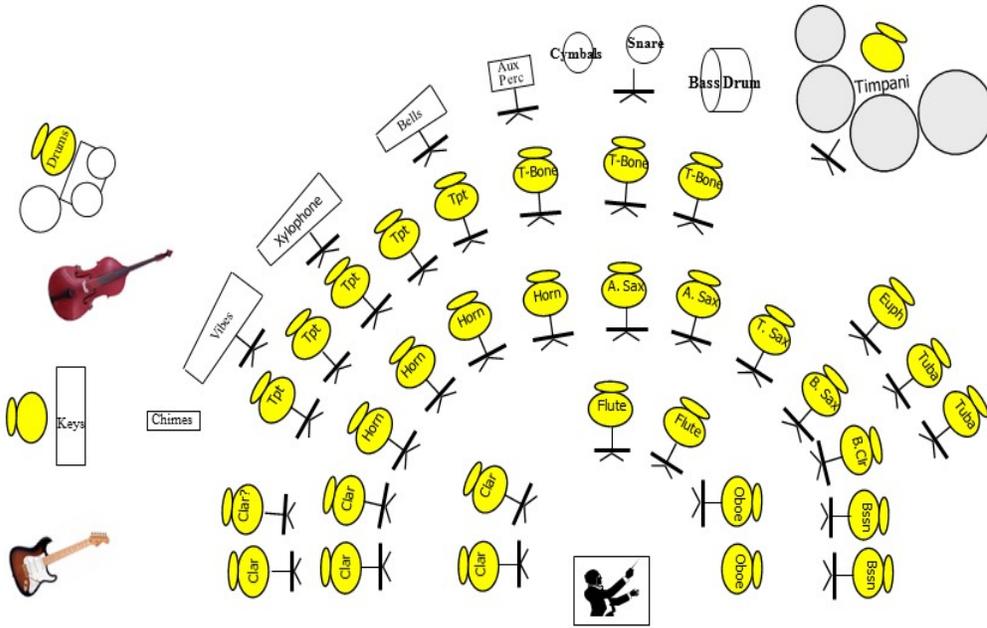

#### Dressing Rooms

Secured dressing room space for 30 men and 20 women is needed. Ideally, we would like to have a separate dressing room for our Commander/Conductor. Garment racks and mirrors are appreciated, if available. Dressing rooms should be attached to rest rooms, if possible, and must be secure while the band performs. Please inform the ops coordinator of any rules concerning smoking, eating, etc.
